

Write a Python program to find the maximum and minimum elements in a given list.

Code:

```
Num= [23, 45, 12, 67, 89, 5, 34]
```

```
Max = max(num)
```

```
Min= min(num)
```

```
Print("Maximum:", max)
```

```
Print("Minimum:", min)
```

Output:

Maximum:89

Minimum:5
