

Question

Write a Python program to copy the contents of one file into another file.

Code

```
source=open("source.txt","r")
data=source.read()
source.close()
target=open("copy.txt","w")
target.write(data)
target.close()
print("File copied successfully")
```

Input

```
source.txt contains:
Hello Python
```

Output

```
File copied successfully
```
