

INTERSECTION – Python Programming

Question

Write a Python program to find the intersection of two sets.

Code

```
a={1,2,3,4,5,6}  
b={4,3,9,8,0}  
print(a.intersection(b))
```

Input

No user input is required. The sets {1, 2, 3, 4, 5, 6} and {4, 3, 9, 8, 0} are given in the program.

Output

```
{3, 4}
```
