

DESCENDING – Python Programming

Question

Write a Python program to sort a list in descending order.

Code

```
r=[7,8,3,2,5,0]
r.sort(reverse=True)
print(r)
```

Input

No user input is required. The list [7, 8, 3, 2, 5, 0] is given in the program.

Output

```
[8, 7, 5, 3, 2, 0]
```
