

Question

Write a Python program to find the LCM of two numbers.

Code

```
a = int(input("Enter a number"))
b = int(input("Enter a number"))
x = a
y = b
while y != 0:
    x, y = y, x % y
gcd = x
lcm = (a * b) // gcd
print("LCM", lcm)
```

Input

```
12
18
```

Output

```
LCM 36
```
