

## Question

Write a Python program to find the square root of a number using the Newton Raphson method.

## Code

```
n = float(input("Enter a number: "))
guess = n / 2
for i in range(10):
    guess = (guess + n / guess) / 2
print("Square root", guess)
```

## Input

25

## Output

```
Enter a number: 25
Square root 5.0
```
