

Question

Write a Python program to perform addition, subtraction, multiplication, and division of two numbers.

Code

```
a = 15
b = 7
print("The sum is", a + b)
print("The subtraction is", a - b)
print("The multiplication is", a * b)
print("The division is", a / b)
```

Input

No input required (the values are defined in the program).

Output

```
The sum is 22
The subtraction is 8
The multiplication is 105
The division is 2.142857142857143
```
