

Question

Write a Python program to check if a number is positive, negative, or zero using the comparison operator.

Code

```
a = int(input("Enter a number"))
if a < 0:
    print("It's negative")
elif a == 0:
    print("It's zero")
else:
    print("It's positive")
```

Input

9

Output

It's positive
